CONFERENCE WORK DIRECTIONS

1. Digital state – modernization of the structure of public administration.
2. Implementation of artificial intelligence and digitalization technologies in public administration.
3. Effective use of big data in digital transformation.
4. Innovative approaches to modernization of economy.
5. Current issues of cybersecurity in the digital world.
6. Prospects for the development of telecommunication technologies.

1. Scientific direction, purpose and objectives of the conference.

Scientific direction – the conference covers areas such as digital government, digital transformation, information technology and its application in public administration. The topics discussed include artificial intelligence, intelligent data analysis and IoT technologies. The aim of the conference is to consider the problems and opportunities arising in the process of digitalization of public administration systems, to find ways to modernize the structure of public administration and improve efficiency through innovative technologies and digital approaches.

2. The issues under discussion :

This international scientific and practical conference discusses the following issues:

– development of effective methods of communication between the state and society through digital platforms;

- integration of large volumes of data into public administration;
- training of personnel necessary for managing and mastering digital transformation;
- the impact of artificial intelligence and digitalization on public administration and security.

All conditions have been created for holding the conference: private computer, necessary software and hardware. Presentations must be made in Power Point.

Requirements for conference materials

1. Articles must be in IMRAD format;
2. Full reference source (link must be correct);
3. Numbering of the list of references from internal sources according to the form [1], [2];
4. Authors are responsible for the content of the article, the accuracy of the published information, quotations, titles and other information. The conference organizing committee has the right to reject submitted articles if they do not meet the requirements.

Submission of articles

Articles and abstracts will be accepted through the TUIT conference management system (<https://conference.tuit.uz/conferences/1>) until December 7, 2024.

NOTE! Articles submitted to the conference organizing committee, edited and recommended based on expert opinions, are planned for publication in scientific journals of TUIT.
